Course Description

In this course, you will become familiar with how and why social research is done and develop the skills necessary to evaluate and design qualitative research studies. In the first part of the course, you will confront issues regarding the nature of knowledge and learn how to ask good research questions. In the second part, you will learn how to pursue those questions ethically, rigorously and systematically using several qualitative techniques. As with any skill, learning how to conduct social research requires practice, and this course will give you hands-on experience, so you will gain competence in the logic and conduct of qualitative research.

Towards the end of the course, you will be introduced to important conversations on the framing, significance and challenges pertaining to subjectivity, gender, race and ethnicity in qualitative research.

The prerequisite to take this course is 1.0 SOC FCE at the 100 level. Students without this prerequisite can be removed at any time without notice.

Course Goals

After completing this course, students should be able to:
- create thoughtful, qualitative research questions
- describe, develop and evaluate qualitative research methodologies
- code, analyze and synthesize insights from collected qualitative data
- harness the insights of qualitative research in approaching other substantive areas in sociology
## Requirements and Grading

**Stepping Stone Submissions**

Course Policies

Attendance and Preparation
Attendance is mandatory. Students are responsible for all material presented in class. Students who are unable to attend class on a given day are responsible for obtaining notes on all material covered, including lecture material and course announcements. In addition, students are expected to complete all assigned readings in advance of the class period for which they are assigned.

Tutorials
Students are required to participate in the mandatory tutorials associated with this course. Tutorial sessions are on either Thursday right after class 4-5pm in Sidney Smith Hall 1069, or on Friday 12-1pm in Sidney Smith Hall 2111. Tutorials will take place on each week of the term but the first one. Tutorials are designed to help you practice methodological skills and will prepare you for the final project associated with the course. Attendance and activities in tutorial are graded.

Course Website
The course website is available at TBD. The site will contain the course syllabus, resources, and course announcements. Students are responsible for the content of all course materials.

Email
When emailing your professor or TA, please use your utoronto.ca or mail.utoronto.ca address. Please also include “SOC204” and a brief description in the subject line, so your email can be easily prioritized. Emails will typically be answered within 48 hours on work days. Neither the instructor nor the TAs will check their email on weekends. Keep in mind that for simple questions, email is the preferred method of communication. However, for longer questions, students should attend office hours and/or schedule an appointment with a TA or the professor. Emails regarding information that is covered in the syllabus and email missing the appropriate subject line will not be replied to.

Office Hours
TA office hours are by appointment only. If you would like to meet with the TA to discuss assignment feedback, exam preparation, course content or concerns, please contact them with 24-hour notice (via email). TAs will not hold office hours unless notified of a student’s arrival.

Instructor Bogović has drop-in office hours on TBD. If you have a conflict with these regularly scheduled hours, please make an appointment by contacting Instructor Bogović directly (rene.bogovic@mail.utoronto.ca). In your email, include details about the nature of your meeting request and a list of dates/times when you are available. You will typically receive a response within 48 hours on weekdays.

Late Assignments/Submissions
This course relies on several smaller assignments which build upon each other. It is important that students record due dates in their personal calendars and follow the course schedule meticulously.
Under no circumstances will course assignments and/or exams be reweighed or substituted.

If you are experiencing extenuating circumstances (such as illness and/or injury), you must contact Instructor Bogović immediately and provide relevant documentation. Proper documentation consists of an original (hardcopy or scanned copy sent via email) Verification of Student Illness or Injury form completed by a doctor and submitted on or before the due date of the assignment (you may find the form at www.illnessverification.utoronto.ca). You should also contact your college Registrar to inform them of your situation. While extensions are rarely granted, they may be considered in the case of students encountering grave, unforeseen circumstances. Requests for extensions will not be considered retroactively (i.e. after a due date has passed).

Unless otherwise specified, all assignments are due on Quercus, by the due date and time provided. Late assignments will be penalized 5 percentage points per day, including weekend days. Late assignments will not be accepted via email.

Re-Grading Assignments
All requests for re-grading course assignments should be made to your TA within one week of the date when the assignments are returned to the class. A short memo that clearly states specific reasons to justify the request and backs up these reasons with evidence from your assignment must be submitted to your TA. No re-grading requests will be considered if the request is submitted more than one week after the assignments are returned to the class. This deadline applies to all students including those who missed the class when the assignments were returned. It is the responsibility of the student to pick up their assignments on time in class.

Missed Exam
Students who miss an exam will be assigned a grade of 0. However, students may have an absence excused with proper documentation in the case of illness or unforeseen personal circumstance. All make-up exams are scheduled through FAS and must be arranged with your college Registrar. Students who do not attend the scheduled make-up will receive a grade of 0.

Turnitin.com
Normally, students will be required to submit their course assignments to Turnitin.com for review of textual similarity and detection of possible plagiarism. In doing so, students will allow their assignments to be included as source documents in the Turnitin.com reference database, where they will be used solely for the purpose of detecting plagiarism. The terms that apply to the University’s use of the Turnitin.com service are described at:
http://www.teaching.utoronto.ca/teaching/academicintegrity/turnitin/conditions-use.htm

Assignments not submitted through Turnitin will receive a grade of zero (0 %) unless a student instead provides, along with their assignment, sufficient secondary material (e.g., reading notes, outlines of the paper, rough drafts of the final draft, etc.) to establish that the paper they submitted was truly their own. The alternative (not submitting via Turnitin) is in place because, strictly speaking, using Turnitin is voluntary for students at the University of Toronto.

Writing Centres (http://www.writing.utoronto.ca/writing-centres/arts-and-science)
All students are encouraged to visit and make use of the available writing centres. Writing tutors may help you brainstorm ideas, develop a thesis, structure and organize your paper, present your
evidence effectively, argue logically, cite appropriately and express yourself clearly and concisely. However, proofreading and copyediting for spelling, grammar, or format are not within the primary scope of the writing centres.

Accessibility
The University of Toronto is committed to accessibility. If you require accommodations or have any accessibility concerns, please visit http://studentlife.utoronto.ca/accessibility as soon as possible. If you are registered with Accessibility Services, please forward your accommodations paperwork to Instructor Bogović within the first two weeks of the course so that arrangements can be made.

Academic Integrity/Academic Misconduct
The University of Toronto treats academic integrity and academic misconduct very seriously. To participate honestly, respectfully, responsibly, and fairly in the academic community at U of T, you should familiarize yourself with the University of Toronto’s Code of Behaviour on Academic Matters (http://www.governingcouncil.utoronto.ca/policies/behaveac.htm).

In addition, students should acquaint themselves with the rules concerning plagiarism and other forms of academic misconduct, including but not limited to:

- Using someone else’s ideas or words without appropriate acknowledgement.
- Copying material word-for-word from a source without quotation marks.
- Including references to sources that you did not use.
- Obtaining or providing unauthorized assistance on any assignment including (e.g.) working in groups on assignments that are supposed to be individual work.
- Lending your work to a classmate who submits it as his/her own.
- Letting someone else look at your answers on a test.
- Falsifying or altering any documentation required by the University.

Student Contacts
You are responsible for all material presented in class, including announcements. If you are unable to attend class, you should obtain notes from a classmate. Write down the contact information for two of your classmates below in case you need notes.
