

SOCIOLOGY 6023
SOCIOLOGY OF MENTAL HEALTH:
MENTAL HEALTH AS A SOCIAL MIRROR

Blair Wheaton
University of Toronto
Fall, 2021

Room: 240
Day: Monday 4-6
Phone: 978-6317 (maybe)
Email: blair.wheaton@utoronto.ca

ACKNOWLEDGMENT

I want to thank the following former students from this department who contributed to the content of this course and made helpful suggestions about new readings: Patricia Louie (University of Washington), Jonathan Koltai (University of New Hampshire), Laura Upenieks (Baylor University), Shirin Montazer (Wayne State University), Marisa Young (McMaster University), Atsushi Narisada (St. Mary's University), and Marie-Pier Joly (Concordia University).

OVERVIEW

While sociologists share with psychologists, epidemiologists, and psychiatrists an interest in mental health via the diagnostic concept of disorder, sociologists also typically pair this interest with a focus on the broader implications of mental health as a “social mirror” (Avison, McLeod, and Pescosolido, 2007) --- an efficient marker which “reflects” the emotional and functioning consequences of experience in varying social environments, social conditions, as well as the social contexts and individual histories in individual’s lives. In this role, mental health is aggregated shorthand, a reference point, for the meanings that flow from the summed impact of past and current experience.

The phrase “mental health is everyone’s ultimate dependent variable” (Wheaton, 2001) captures this role. This statement is designed to point to the prevalence of implicit concern for the subjective well-being of individuals buried in the manifest research questions that constitute fundamental sociological issues across the entire landscape of the discipline. If you have not had a course in the sociology of mental health before, we start from the position that mental health is endemic in a broad range of theorizing and research in sociology.

In this course we will examine mental health as a social mirror. The course is organized around general and specific special topic stages. In the early stages, we examine the state of the canon in the sociology of mental health pertaining to its role as a reflection of social inequalities. We begin by considering the difficult and sometimes controversial issue of designating mental health differences in categories (disorder) vs a continuum (distress), and the role sociology has played in this debate. We continue by considering a range of inequalities and the nexus of those inequalities, starting with the foundational role of social class, and mobbing on to gender, race, immigration, marital status, work, and age and the life course. Putting together those inequalities is a major issue. We will then consider the most general framework for understanding these inequalities – the stress process. I

will present ongoing research testing a generalized stress process model using longitudinal data in Canada.

The specific stages involve three special topics: : 1) the **internationalization** of mental research, beyond North America, including an assessment of the generality vs specificity of “Western” explanations of mental health differences, and comparative research looking at the effects of social and public policy on mental health differences across nations; 2) The effects of **social contexts** on mental health, starting with neighbourhoods and ending with macro historical events – this year: 9/11, natural disasters, and COVID; and 3) Current debates and discourses about race, gender, and mental health. This last section will focus on debates in recent research about categories, and how to address those debates.

CORE TOPICS AND READINGS

This section details the week by week content of the course and readings we will choose *from* for consideration in class. I will also post a supplementary reading list for reference that will help students with their papers.

Important: in some weeks, we select readings from the list – we do not consider all readings. Usually, we consider two per presenting student, or three if short articles; in some weeks, there may be two students presenting and thus more articles will be chosen.

WEEK 1: OVERVIEW OF THE AREA

Carol S. Aneshensel, Jo C. Phelan, and Alex Bierman. “The Sociology of Mental Health: Surveying the Field.” Pp. 1-23 in Carol S. Aneshensel, Jo, C. Phelan, and Alex Bierman (eds.). Handbook of the Sociology of Mental Health. New York: Springer, 2013.

[Class: I present.](#)

WEEK 2: DEFINING AND MEASURING MENTAL HEALTH

Horwitz, Allan V. 2007. "Distinguishing distress from disorder as psychological outcomes of stressful social arrangements." **Health**: 11(3):273-289.

Wheaton, B. 2007. "The twain meet: distress, disorder and the continuing conundrum of categories (comment on Horwitz)." **Health** 11(3):303-319.

Schnittker, Jason. “The Proximity of Common Unhappiness and Misery.” **Society and Mental Health** 2012: 135-153.

[Class: I present; discussion of student comments](#)

WEEK 3: SOCIAL PATTERNS AND THE FOUNDATIONAL ROLE OF SOCIAL CLASS.

Kessler, Ronald C., Patricia A. Berglund, Olga Demler, Robert Jin, Kathleen R. Merikangas and Ellen E. Walters. 2005. "Lifetime prevalence and age-of-onset distributions of DSM-IV disorders in the National Comorbidity Survey Replication." **Archives of General Psychiatry** 62(6):593-602.

Mirowsky, J., & Ross, C.E. (2017). **Social Causes of Psychological Distress** (2nd ed.). Routledge. “Basic and New Social Patterns. Selected pages from Pp. 75-156 (selected pages)..”

[Class: Student Presentations, paper overviews and class discussion. .](#)

 WEEK 12: “WHEN RESEARCH GOES BAD”

This class will be a discussion of two topics: the noise in research findings and how beliefs and theories “of the moment” affect our beliefs and thus our choices of credible evidence, using sociology of mental health examples, and a broad discussion of how social change affect population mental health.

[Class: I present.](#)

 CLASSES

Attendance: Classes this year will include an option for off-site participation. If students are concerned, for any reason, about attending classes on campus, we will arrange a collective Zoom to supplement the in-person class. Off-campus students will join the class along with in-class attendees, so that all students are on Zoom.

Make-up Day: This is a Monday class. It will be necessary to add a make-up day on Thursday December 9th to complete 12 weeks in class.

Class Structure. In this seminar, we *typically* begin with student presentations on assigned papers. Students who posted comments on these papers will be expected to raise their questions as part of the presentation. In the latter weeks of the course, students will give short (10-15 minutes)

overviews of their paper topics. I will reserve the last 15 to 20 minutes for commentary and a zoomed-out view of each topic.

Note that I present in weeks 1 through 3, week 6, and in week 12.

REQUIRED WORK

There are four pieces of work to be completed: 1) two in-class presentations; 2) two posted comments on papers presented week to week; 3) one in-class overview of your paper; and 4) the final paper.

The timing of the weeks to present an analytical review of the papers assigned that week depend on your choices. Those who sign up early will have the most choice. You should choose a topic to cover; we will assign specific readings later.

PRESENTATIONS

In-class presentations should focus on *essential* issues in the paper or chapter, and attempt to give a balanced assessment of the strengths and weaknesses. I encourage students to take a critical perspective, but the mandate does not end there. I also encourage students to imagine promoting an idea, a theory, a different research design, or a new research question that follows from your analysis of the reading.

COMMENTS

All students will post **two** comments on the course website offering questions, critiques, or analysis of readings discussed week to week. Each posted comment will focus on an essential issue in one of the readings, or across readings. There will be scheduling of these comments so that there are some posted comments to be addressed in each week of the class – but no more than two per week. Each posted comment will be one to two paragraphs at most, and intended for discussion during the class. Comments must be posted by Friday night before the Monday where a reading will be discussed. This gives presenters a chance to incorporate comments into their presentation..

Comments can raise critical questions, argue for the importance of the reading and its contribution, suggest what is missing and should be considered, connect the reading to other readings, or propose research which follows up the reading and resolves questions in the reading or tests the generality of findings in the reading. These comments should mention the parts of the paper that led to the comment you make.

PAPER

Students will have the option of choosing from two different types of papers to complete the course. Papers should not exceed 10,000 words in total, including references.

Option 1 is a “theoretical” paper on one of the following topics:

- An analysis of the problem of generalizing work on mental health in North America either comparatively, or cross-culturally, with some discussion of differences in mental health concepts.
- An application of course theories, concepts, and models to research in other areas of sociology, with a discussion of implications for the chosen literature(s).

- The importation of theoretical frameworks in other areas of sociology to the sociology of mental health, with discussion of implications for research in the sociology of mental health.
- A discussion of concepts, hypotheses, and theoretical assumptions of a dominant perspective in the sociology of mental health, with a proposal for expansion or modification of that perspective.

Other topics can be proposed individually.

Option 2 is a research-based paper, written with an eye to the requirements of submission either to a conference, or to a peer-reviewed journal, or as a draft of a dissertation paper, or as a preliminary version of a paper to be followed up in the Research Practicum. This paper should analyze data you already have access to at the beginning of the course. Data can be qualitative, or quantitative, and can include content analyses, online data, or archival data. In this paper you argue for a unique role for the ideas / hypotheses proposed in the paper and test them using your data. It is expected you follow a standard structure in writing this paper.

WEIGHTS

The table below states the weights assigned for each piece of work in this course:

Required Work	Number / Weight	Total Weight
In-class presentations	2 x 15%	30%
Comments online	2 x 10%	20%
In-class overview of paper	1 x 10%	10%
Final paper, due December 17th .	1 x 40%	40%

GRADING DETAILS

I use the following guidelines for translating letter grades into numeric equivalents. This is important because you can only derive an overall numeric grade by using this translation. In general, I use a midpoint equivalent at each letter grade level.

I also add “borderline” grades, reflecting what I feel is appropriate for work clearly on the border between two grade levels. This helps create finer distinctions in final grades.

Letter Grade	Numerical Equivalent
A+	95
A / A+	90
A	87
A- / A	85
A-	82
B+ / A-	80
B+	78
B / B+	77
B	75
B- / B	73
B-	71
FZ**	0 - 69%

CLASS SCHEDULE

Week	Date	Topic	Presentations		
			<i>Me</i>	<i>Readings</i>	<i>Papers</i>
1	Sept. 13	Overview	☐		
2	Sept. 20	Concepts and Measurement	☐		
3	Sept. 27	Social Patterns and Social Class	☐		
4	October 4	Inequalities I: Race, Gender, Immigration		☐	
	October 11	No class		☐	
5	October 18	Inequalities II: Marriage and Relationships, Age and the Life Course		☐	
6	October 25	Explaining Inequalities	☐	☐	
7	Nov. 1	Special Topics I: International / Comparative. Prevalence and Patterns		☐	
	Nov. 8	No class			
8	Nov. 15	Special Topics II: International / Comparative. Stress Process		☐	☐
9	Nov. 22	Special Topics III: Social Contexts: Neighbourhoods		☐	☐
10	Nov. 29	Special Topics IV: Social Contexts: Macro/Historical.		☐	☐
11	Dec. 6	Special Topics V: Debates and Discourses, Race and Gender		☐	☐
12	Dec. 9	“When Research Goes Bad” Social Change and Mental Health.	☐		

The following parts of the syllabus are a required template, but also express important principles, procedures, and values.

PENALTY FOR LATENESS CLAUSE

For both undergraduate and graduate courses, instructors are not obliged to accept late work, except where there are legitimate, documented reasons beyond a student's control. In such cases, a late penalty is normally not appropriate.

In this course, the required work schedule is determined by choices of week in the initial class. Comments can be posted in any week from weeks 2 through 11. The paper is due December 17th. Please note: a late paper must be accompanied by a medically certified explanation. In these cases, and only in these cases, papers may be accepted up to three weeks after the end of class. Late papers without a medical explanation will receive a 10% discount in the grade – not in the weight.

ACADEMIC INTEGRITY CLAUSE

Copying, plagiarizing, falsifying medical certificates, or other forms of academic misconduct will not be tolerated. Any student caught engaging in such activities will be referred to the Dean's office for adjudication. Any student abetting or otherwise assisting in such misconduct will also be subject to academic penalties. Students are expected to cite sources in all written work and presentations. See this link for tips for how to use sources well: (<http://www.writing.utoronto.ca/advice/using-sources/how-not-to-plagiarize>).

According to Section B.I.1.(e) of the [Code of Behaviour on Academic Matters](#) it is an offence "to submit, without the knowledge and approval of the instructor to whom it is submitted, any academic work for which credit has previously been obtained or is being sought in another course or program of study in the University or elsewhere."

By enrolling in this course, you agree to abide by the university's rules regarding academic conduct, as outlined in the Calendar. You are expected to be familiar with the *Code of Behaviour on Academic Matters* (<http://www.artsci.utoronto.ca/osai/The-rules/code/the-code-of-behaviour-on-academic-matters>) and *Code of Student Conduct* (<http://www.vicereprovoststudents.utoronto.ca/publicationsandpolicies/codeofstudentconduct.htm>) which spell out your rights, your duties and provide all the details on grading regulations and academic offences at the University of Toronto.

ACCESSIBILITY SERVICES

It is the University of Toronto's goal to create a community that is inclusive of all persons and treats all members of the community in an equitable manner. In creating such a community, the University aims to foster a climate of understanding and mutual respect for the dignity and worth of all persons. Please see the University of Toronto Governing Council "Statement of Commitment Regarding Persons with Disabilities" at <http://www.governingcouncil.utoronto.ca/Assets/Governing+Council+Digital+Assets/Policies/PDF/ppnov012004.pdf>.

In working toward this goal, the University will strive to provide support for, and facilitate the accommodation of individuals with disabilities so that all may share the same level of access to opportunities, participate in the full range of activities that the University offers, and achieve their full potential as members of the University community. We take seriously our obligation to make this course as welcoming and accessible as feasible for students with diverse needs. We also understand that disabilities can change over time and will do our best to accommodate you.

Students seeking support must have an intake interview with a disability advisor to discuss their individual needs. In many instances it is easier to arrange certain accommodations with more advance notice, so we strongly encourage you to act as quickly as possible. To schedule a registration appointment with a disability advisor, please visit Accessibility Services at <http://www.studentlife.utoronto.ca/as>, call at 416-978-8060, or email at:

accessibility.services@utoronto.ca. The office is located at 455 Spadina Avenue, 4th Floor, Suite 400.

Additional student resources for distressed or emergency situations can be located at distressedstudent.utoronto.ca; Health & Wellness Centre, 416-978-8030, <http://www.studentlife.utoronto.ca/hwc>, or Student Crisis Response, 416-946-7111.

EQUITY AND DIVERSITY

The University of Toronto is committed to equity and respect for diversity. All members of the learning environment in this course should strive to create an atmosphere of mutual respect. As a course instructor, I will neither condone nor tolerate behaviour that undermines the dignity or self-esteem of any individual in this course and wish to be alerted to any attempt to create an intimidating or hostile environment. It is our collective responsibility to create a space that is inclusive and welcomes discussion. Discrimination, harassment and hate speech will not be tolerated.

Additional information and reports on Equity and Diversity at the University of Toronto is available at <http://equity.hrandequity.utoronto.ca>.
