**SOC256H1S: LIVES AND SOCIETIES**

**2022 WINTER TERM**

*Class meets:* Tuesdays, 4:10 – 6:00 PM  
Location: RW110

*Professor:* Bonnie H. Erickson  
E-mail: ericson@chass.utoronto.ca

*Teaching Assistant:* Olimpia Bidian  
E-mail: olimpia.bidian@mail.utoronto.ca

*Office hours:* Because of COVID-19, your instructor and teaching assistant will not hold office hours in person in an office. Students can consult with the instructor and the TA by email at any time, or on Zoom by appointment.

*Readings:* Available through Quercus

*Prerequisite:* SOC100H1. Students without this requirement will be removed at any time discovered, without notice.

**INTRODUCTION**

Much sociological work considers people at one point in their lives: while working, while in school, while parents of young children, and so forth. Life course analysis makes its special contribution by paying attention to biographies and to the ways that (1) human life histories are shaped by a person’s place in society and in social history, and (2) how human life decisions cumulate to affect societies.

In this class we will consider the very large scale comparative picture: very different kinds of society (from hunter-gatherer groups to modern industrial societies) and the differences that kind of society makes to: qualitative differences in life course stages, the timing of stages, transitions between stages, the basic facts of birth and death, and the ways people see the life course.

**GOALS AND LEARNING OUTCOMES**

In this course, students will learn how to:

1. Think critically about how societal structures affect the life course.
2. Explore how life transitions and their timing differ based on social location.
3. Interrogate the role of technology and the environment in driving social change.
4. Develop qualitative methodological skills to conduct semi-structured interviews and critically analyse differences in how life course transitions are experienced and perceived.
ASSIGNMENTS AND TESTS

1. **Research Paper Proposal:** Students will write a brief proposal where they identify the transition rite they have selected to investigate for their final paper and (using a pseudonym) identify who they plan to interview so as to gather the data needed for completing the assignment. They should outline any relevant ethical concerns with conducting the interview and identify the methods they will use to attend to them. In addition, the proposal should address why the transition rite they have selected is sociologically significant. A handout will be distributed with more detailed assignment instructions. Proposals are worth 10% of the final grade. Proposals should be no more than two double spaced pages of text. They should be uploaded to Quercus by midnight on February 1.

2. **Final Research Paper:** Transition rites are rituals marking a change from one life stage to another or, marking steps in the life course. Students will write a research paper comparing the same kind of transition rite in two different societies, based on a qualitative interview they conduct with an informant. For example, you could interview a person who has lived in two different society-types about the differences in a transition rite they have observed (e.g. a Canadian wedding and a Syrian wedding). You could also interview a person who has experienced the same transition rite at different times in the same society (e.g. what was your grandparent’s experience of high school graduation like, compared to what they observed as a guest at a recent graduation ceremony)? Your informant and topic (i.e. transition rite) should be checked through the proposal process. If you wish to change topics/informants after having submitted the proposal you must email the instructor for approval. Interviews must follow ethical guidelines, which will be discussed in the January 25 class. Interviews should not be conducted until you have received feedback on your essay proposal, which we hope to provide by one week after you submit them, that is, February 8. The goal of the paper is to use course materials to explain similarities and differences in the “same” rite in different types of societies. A handout will be distributed with more detailed assignment instructions. Papers are worth 40% of the final grade, should be no more than 10 pages double-spaced and be uploaded to Quercus by midnight on March 22.

3. **In-class Tests.** Students will write 2 in-class tests, worth 25% each, assessing their ability to think critically about the readings and lecture materials. Both tests will be essay tests. Examples of possible questions will be provided to students prior to each test. Test 1, on February 15, will primarily cover material from the first half of the course (January 11 through February 8). Test 2, on April 5, will primarily cover material from the second half of the course, March 1 through March 29.

Course e-mail policies:
1) We will only accept e-mails from your University of Toronto e-mail account. Please put “SOC 256” in your subject line so we know the message is course-related.
2) We cannot provide instant response. We will make every effort to reply to e-mails within 48 hours.
3) Many important course announcements will be sent to you through the University of Toronto e-mail address recorded for you on Quercus. Be sure to check this e-mail account regularly.
4) E-mails asking for information in this course outline (e.g. “How much is the essay worth?) will NOT be answered. Read this outline!

TOPICS AND REQUIRED READINGS

January 11: Introduction: Types of Societies

In this class we review a theory of the evolution of human societies from ones with very simple subsistence technologies to ones with very elaborate subsistence technologies. The theory includes discussions of important differences between societies with different subsistence technologies. We will spend the rest of the course considering the consequences of these societal differences for the lives of people living in these societies.

*Required Reading*

January 18: Introducing Hunter-Gatherer Societies

Your reading and the video we will watch in class introduce you to the history and way of life of two very well studied, and very different, hunting and gathering societies: the Ache and the !Kung. We will use this material as examples of the Nolan and Lenski model of the societal consequences of a foraging subsistence technology, and, as examples of how foraging societies differ from each other in ways that affect life courses.

*Required Reading*

Special resources: Class will start with the video “A Human Way of Life” (Videocass 001452 from the Audiovisual Library).

January 25: The Life Course for Hunters and Gatherers
Howell, and Hill and Hurtado, describe the life courses of the !Kung and the Ache while they were still living in foraging societies. To give some life to these life course descriptions, please read the selection from Shostak, in which an intelligent and articulate !Kung woman tells us about some of the important events in her own life story.

Required Reading

NOTE: This class will begin with the first mini-lecture on your research for your essay. We will discuss ethical issues and how to select and recruit a suitable respondent.

Required reading: Chapter 1(on general principles of inquiry), and Chapter 3 (on ethical issues) from:

February 1: Life Course Stages in Different Societies: Timing and Types of Stages
Here we compare different types of societies in terms of the kinds of life stages they have and how they are timed, with special attention to the role of functional versus chronological age. The readings for the previous week provide rich information for hunting and gathering societies. Gillis discusses the transition from pre-industrial, advanced agrarian society to industrialized society in Europe. Gee provides the changing ages at which people in Canada made key life transitions during industrialization.

Required Reading
Gee, Ellen M. 1987. “Historical Change in the Family Life Course of Canadian Men and

Note: your essay proposals are due by midnight of this day

February 8: Transitions between Stages: Transition Rites

Required Reading

Pages 151-166 from Marjorie Shostak, 1981, Nisa: The Life and Words of a !Kung Woman. New York: Random House. You have read this earlier, but now focus on the material on transitions rites.

NOTE: This class will begin with the second mini-lecture on your research: how to conduct your interview.

Required reading: Chapter 11 (Qualitative Interviewing) from:

February 15: In-class mid-term test

February 22: Reading week, no class

March 1: Childhood in Different Societies

Required Reading

NOTE: this lecture will begin with a mini-lecture on: analysing your data and writing it up.

MARCH 8: Old Age in Different Societies
Required Reading

March 15: Societies and Mortality – How and When do People Die?
Required Reading

March 22: Societies and Fertility; Social Implications of Mortality and Fertility
Required Reading

*Optional Reading* on changes in mortality and fertility as a society changes:

*NOTE: Essays due today!*

March 29: How People in Different Societies See the Life Course

*Required Reading*

*Optional Reading*

April 5: In-class final test

**PROCEDURES FOR PLAGIARISM DETECTION**

Normally, students will be required to submit their course essays to the University’s plagiarism detection tool for a review of textual similarity and detection of possible plagiarism. In doing so, students will allow their essays to be included as source documents in the tool’s reference database, where they will be used solely for the purpose of detecting plagiarism. The terms that apply to the University’s use of this tool are described on the Centre for Teaching Support & Innovation web site ([https://uoft.me/pdt-faq](https://uoft.me/pdt-faq)).
Students are permitted, under our conditions of use, to opt-out of using the university’s plagiarism detection tool. If a student chooses not to submit their assignment through the University’s plagiarism detection tool, instructors will need to find alternative arrangements to check their work as rigorously. (It should be noted that very few students choose to opt out.) Students cannot be penalized for choosing to opt out. If students choose to opt out, they should let their instructor know well in advance of submitting their paper. In this case, the instructor may ask them to submit all of their rough work for an assignment or the instructor may have a short meeting with them and ask pointed questions about their research methodology. Students who do not use the plagiarism detector, and who do not make acceptable alternative arrangements, will receive a grade of zero.

If students in this class wish to opt out of the plagiarism detection tool, they must notify their professor at the start of the course (for our course, by our second class, January 18). They must provide additional materials to show they have done their work themselves. This may include annotated bibliographies, notes for the paper or proposal, and working drafts. They should discuss what they will provide, and when, with Professor Erickson and set up a schedule by January 25. This is quite a bit of extra work, so few students choose this option, but you are welcome to do so.

DO NOT PLAGIARIZE

Be careful to avoid plagiarism. That is, do not copy words from someone else’s writings and present them as your own. If you include someone else’s words, use quotation marks and give proper references. It is NOT enough to just include your source in your list of references. Plagiarism is a serious academic offense with very heavy penalties (see the Academic Handbook). Your essay will be compared to texts from many sources, including earlier student essays and almost everything on the internet. See also the section “More on academic integrity” below.

LATE ESSAY PROPOSALS
Penalty for lateness: 10% of the maximum grade for every day late. For example, if you submit your proposal on February 2, (one day late) and get a grade of 80%, you will lose 10% and get a grade of 70%.

LATE ESSAYS
Penalty for lateness: 10% of the maximum grade for every day late. For example, if you submit your essay on March 23 (one day late) and get a grade of 80%, you will lose 10% and get a grade of 70%. These are heavy penalties, so – don’t be late! The maximum penalty is 100% of your grade, for proposals 10 or more days late.

MISSED TESTS
If you do not write a test at the scheduled time, you will get a grade of zero.

PERMISSION FOR LATE SUBMISSIONS AND MAKE-UP TESTS
If you have acceptable reasons concerning things beyond your control, you may apply for permission to write a make-up test or hand in your essay late.
The most common reason is ill health that makes it impossible to write the test at the scheduled time, or a period of ill health that makes it impossible to complete your essay on time. Because of the COVID-19 pandemic, we no longer require students to get a form filled in by a doctor. Instead, you must do two things. (1) Send an e-mail to your instructor (Professor Erickson) explaining that you are ill and will need to be late with your work. It is not necessary to tell your instructor what your health issue is, this is a personal matter and your privacy must be respected. ONLY send such emails to your instructor, not the TA nor any other person. (2) Declare your absence on the system (ACORN).

In other cases, such as personal or family crisis, get a letter from your registrar. College registrars are very experienced, very discreet, and there to help you. The registrar will assess your situation and send an email to your instructor with their recommendations. The registrar does not normally tell the instructor what the problem is, since your privacy should be respected.

**DATES FOR MAKE-UP TESTS**

Dates will be arranged when we know who is entitled to write a make-up test and when they can do so. If you have to miss a test, send your instructor an e-mail no later than the day of the test. Include ALL the times you would be able to write the make-up test during the week following the test. Be prepared to provide suitable documentation as described above.

**GETTING HELP IN WRITING YOUR ESSAY**

Please remember that your college has a writing lab with lots of experience. These labs are always very popular and very busy, so you need to make appointments well in advance.

**ESSAY TOPICS**

All of you will write a research essay comparing the same kind of transition rite in two different societies, based on an interview with an informant. Your goal is to use course materials to explain similarities and differences in the “same” rite in different types of societies. Transition rites are rituals marking a change from one life stage to another, or marking steps in the life course. Since the February 8 lecture on transition rites will use funerals as an example, you should consider another kind of transition rite such as weddings or graduation ceremonies.

To compare two different kinds of society, you could:

1) compare Canada now to Canada some time ago, by interviewing an elderly person who has taken part in the kind of transition rite you are interested in, both recently and decades ago. Your focus will be on major ways that Canada has changed in (say) the past half century, how these changes have changed the transition rite, and how some aspects of the rite may have survived extensive societal changes.

Or

(2) do the same thing for a different country, interviewing an older person who has experience of the same transition rite in that country in recent times and long ago.

Or

(3) compare the same rite in Canada today and a very different country today. The comparison country should be different in terms of the societal variables discussed in Lenski et al. In today’s world, this means looking at a much less well developed society.
Be sure that you compare truly comparable transition rites. For example if your rite of choice is the wedding, it would not make sense to compare a Christian wedding in Canada with a Hindu wedding in India. It would be too difficult to establish which differences come from different religious traditions and which from the different societal contexts.

IMPORTANT: YOU MUST FOLLOW ETHICAL GUIDELINES !!
Since your essay will be based on an interview, you must follow the proper procedures for ethical research using human subjects. These procedures include: no research on vulnerable populations, protection of your informant’s privacy and anonymity, gaining informed consent, and emphasizing the informant’s freedom to not answer questions and to stop the interview at will. These matters will be discussed in more detail in the mini-lecture on January 25. Copies of the necessary “informed consent” form will be provided. Since these are very important issues, do not start your research until after the lecture on ethics on January 25, and after you get approval of your essay proposal.

TIMING OF YOUR INTERVIEW
You MUST NOT start your research until your proposal has been approved (see previous paragraph). It is also highly advisable to wait until after the lecture on transition rites on February 8, since this will be of great help to you in preparing for your interview. You may look for a suitable respondent before these dates but do not interview them. You should also do the relevant course readings (especially those on transition rites) before your interview.

MORE ON ACADEMIC INTEGRITY
The University of Toronto treats cases of academic misconduct very seriously. Academic integrity is a fundamental value of learning and scholarship at the University of Toronto. Participating honestly, respectfully, responsibly, and fairly in this academic community ensures that your University of Toronto degree is valued and respected as a true signifier of your individual academic achievement.
The University of Toronto’s Code of Behaviour on Academic Matters outlines the behaviours that constitute academic misconduct, the processes for addressing academic offences, and the penalties that may be imposed. You are expected to be familiar with the contents of this document. Potential offences include, but are not limited to:

In papers and assignments:
• Using someone else’s ideas or words without appropriate acknowledgment.
• Submitting your own work in more than one course without the permission of the instructor.
• Making up sources or facts.
• Obtaining or providing unauthorized assistance on any assignment (this includes working in groups on assignments that are supposed to be individual work).

On tests and exams:
• Using or possessing any unauthorized aid, including a cell phone.
• Looking at someone else’s answers.
• Letting someone else look at your answers.
• Misrepresenting your identity.
• Submitting an altered test for re-grading.

Misrepresentation:
• Falsifying or altering any documentation required by the University, including (but not limited to) doctor’s notes.
• Falsifying institutional documents or grades.

All suspected cases of academic dishonesty will be investigated following the procedures outlined in the *Code of Behaviour on Academic Matters*. If you have any questions about what is or is not permitted in this course, please do not hesitate to contact your instructor. If you have questions about appropriate research and citation methods, you are expected to seek out additional information from your instructor or other available campus resources like the College Writing Centers, the Academic Success Centre, or the U of T Writing Website.

STUDENTS WHO NEED ACCOMMODATIONS

   Students with diverse learning styles and needs are welcome in this course. In particular, if you have a disability/health consideration that may require accommodations, please approach Accessibility Services at (416) 978 8060; accessibility.utoronto.ca.

   Accommodations include getting a volunteer note-taker and writing tests under special conditions.

   Do not approach your professor or TA about accommodations. Accessibility services has the necessary expertise, and they provide full confidentiality, so your privacy is protected.
